

TEO Line

design : Sovann Kim

LINE TEO

design : Sovann Kim

What is obvious needs no tricks, the TEO street furniture line goes to the essential, effectively, with nothing superfluous. The fluidity of the lines and the simplicity of the shapes illustrate the designer's intention to purify the message to achieve elegance and balance.

The idea then encounters the shape, served by the nobility of the materials and processes.

Sovann KIM has signed a complete line of street furniture; the TEO line suggests a consistent and modern message that will happily fit into the diversity of urban contexts over time.

Sovann Kim, a designer and artist, founded his own design studio in 1999. His experience in urban and public transport projects means he masters the constraints and challenges at the city, user and detail levels. He regularly works with architect, city planning and landscaping agencies. Amongst his work is the design of station furniture and overhead line support posts for the Reims tram lines or the design of passenger shelters for the Angoulême BHNS that was commissioned in 2019. Sovann Kim also designs street furniture and public lighting lines for recognised industrials. He recently received the Etoile prize from the Observateur du design for the Reims tram stations, the Janus de la Cité for the "Cantine" bench/table as well as the Muuze International Award for the "Kyoto" bench.
